Name _____

Black Holes

Student Datasheet ...

- How did the Hubble Telescope provide evidence that “black holes” really exist?

- What happens to anything that goes down the drain of a black hole?

- What do some scientists think may be inside a black hole..?

Something else to think about…

Why are they called “black holes”..?
Nothing – not even light – can escape them.

Evidence of black holes is one of the most unbelievable findings in scientific history. Even scientists can be uncomfortable talking about them because they sound like science fiction.
